Your 3 Critical Mark Leaks (Diagnosed from Mock Data)

- **Leak #1: -14 Marks Lost to Blind Guessing**
Recent mocks show 21 to 28 wrong answers per test! Cutting wild guesses in GA and Vocab instantly saves **+10 to +14 marks**.
- **Leak #2: Math Speed Traps & Unattempted Questions**
Math scores swing wildly (46 → 15) because you get bogged down on 2-3 calculative traps and leave 10 easy questions unattempted at the end.
- **Leak #3: High-Frequency Error Topics**
516 errors logged: Mensuration 3D (48), Profit & Loss (45), Algebra (42), Time-Speed-Distance (36), and English Voice/Jumbles.

The Non-Negotiable 60-Minute Exam Protocol (Strict Order)

Clock Window	Section	Strategy & Rule	Hard Stop
00:00 – 06:00 (6m)	General Awareness	Attempt only questions you know with 100% or 50% confidence. Strictly NO blind guesses. Target 12–15 questions.	Exit at 06:00 regardless of pending questions.
06:00 – 18:00 (12m)	English Language	Grammar & Voice first → Comprehension → Vocab last. If an idiom/synonym is totally alien, skip immediately.	Exit at 18:00 sharp. Minimum 21+ attempts.
18:00 – 34:00 (16m)	Reasoning	Solve 22-23 direct questions. If a number series or analogy logic does not click in 30 seconds, Mark for Review & SKIP .	Exit at 34:00 with at least 42+ marks secured.
34:00 – 58:00 (24m)	Quantitative Aptitude	2-Pass System: • <i>Round 1 (34m–48m)</i>: Sweep 16–17 direct formula questions (Algebra, Trig, Simplification, DI). • <i>Round 2 (48m–58m)</i>: Tackle 4–5 calculative Mensuration / TSD questions.	The 45-Second Rule: Never spend > 60s without writing steps.
58:00 – 60:00 (2m)	Buffer & Final Review	Revisit 1 or 2 marked questions in Reasoning or Math. Verify no accidental double clicks.	Submit at 60:00 with calmness.

💡 **The Golden Rule of 150+:** "You don't need to solve all 100 questions. You only need to solve 78 to 80 questions with 94%+ accuracy. Skipping a time-trap question within 20 seconds is worth +2.5 marks!"
